

1 2mm Thickness Distribution Box

Article Overview

A 1.2mm thickness distribution box is a durable, waterproof electrical enclosure made from cold-rolled steel or stainless steel, suitable for indoor and outdoor applications.

Material and Construction

1.2mm distribution boxes are typically made from cold-rolled steel or stainless steel, providing strong resistance to impact, rust, and corrosion for long-term use in harsh environments . The boxes often feature powder-coated finishes in colors like RAL7035 or RAL7032, enhancing durability and aesthetic appeal . Some models include epoxy polyester coatings for additional protection against environmental factors .

Waterproof and Dustproof Ratings

These boxes commonly have IP65 or IP66 ratings, ensuring protection against dust, water jets, and moisture, making them suitable for outdoor installations, industrial sites, and areas with high humidity . Reinforced edges and sealed doors help maintain the integrity of the enclosure.

Customization Options

1.2mm distribution boxes can be customized in terms of:

- Number of ways: 4, 8, 12, 16, 24, or 36 ways .
- Dimensions and sizes: Surface-mounted or flush-mounted options are available .
- Mounting plates: Often made from 1.5mm or 2mm steel, with powder-coated or galvanized finishes .
- Color and branding: Custom RAL colors and OEM logos can be applied .
