

100G Optical Active Device

Article Overview

Cisco QSFP28 100G Active Optical Cables (AOCs) are high-performance, genuine products designed for reliable 100Gbps connectivity in data centers and enterprise networks.

Overview of 100G AOCs

100G Active Optical Devices (AOCs) are high-speed optical cables that provide 100Gbps connectivity using the QSFP28 form factor. They are designed for short- to medium-range connections between switches, routers, servers, and other networking equipment without requiring additional transceivers or media converters. AOCs are hot-swappable, low-power, and compliant with IEEE 802.3bm standards, ensuring high signal integrity and minimal latency.

Key Cisco Genuine Products

- Cisco QSFP-100G-AOC1M
- Length: 1 meter
- Form Factor: QSFP28
- Transmission: 100Gbps over multimode fiber
- Applications: Direct connections in data centers and enterprise networks
- Features: Low power consumption, excellent signal integrity, compact design for reduced rack clutter
- Warranty: Typically comes with a 365-day warranty when purchased from authorized resellers
