

3C Switch for Aggregation

Overview

If you're building a 2026-ready aggregation layer-either for a campus fabric (distribution/core) or a data-center edge pod-the H3C S6530X-48Y8C is designed for the mainstream upgrade path: 25G downlinks + 100G uplinks, with resiliency options (IRF2 / M-LAG) and modern ops. If you're building a 2026-ready aggregation layer-either for a campus fabric (distribution/core) or a data-center edge pod-the H3C S6530X-48Y8C is designed for the mainstream upgrade path: 25G downlinks + 100G uplinks, with resiliency options (IRF2 / M-LAG) and modern ops. This document assumes that you have basic knowledge of Ethernet link aggregation. As shown in Figure 1, both Device A and Device B forward traffic from VLAN 10 and VLAN 20. Link aggregation has the following benefits:

- Increased bandwidth beyond the limits of any single link. In an aggregate link, traffic is distributed across the member ports.

"Campus Networks Typical Configuration Examples" provides typical campus network networking modes and a variety of deployment examples. Page 2 All other company and product names may be trademarks of the respective companies with which they are associated.
