

6-core fiber optic terminal box cost-effective customs declaration

Article Overview

A 6-core fiber optic terminal box can be cost-effectively imported by selecting a suitable wall-mounted or pre-assembled model and using the correct HS Code for customs declaration.

Product Overview

A 6-core fiber optic terminal box is a compact enclosure used for fiber management in FTTH (Fiber-to-the-Home) or FTTx networks. It serves as a termination point for optical fibers, protecting splices and connectors while ensuring minimal optical loss. Common features include:

- Wall-mounted or pole-mounted design for indoor and outdoor use .
- Material: Flame-retardant PC or ABS for durability and UV resistance .
- Capacity: Supports 6 fibers, with options for preloaded adapters or splitters .
- Applications: Residential buildings, telecom entrances, and network distribution points .
- Pre-assembled options: Reduce installation time and labor costs, providing a cost-effective solution for FTTx deployments . Manufacturers like Gcabling, Bud Industries, and MEXFOSERV offer reliable 6-core terminal boxes with customizable features such as pad printing for branding and integrated fiber management .
