

Actual installation diagram of cable trays

Overview

Comprehensive technical drawing illustrating various cable tray installation details for electrical systems. The document includes multiple configurations for mounting trays with Ø10mm threaded rod supports and expansion/anchor bolt connections. This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill. en completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. There is a maximum load capacity per hanger of 318 kg (700 lbs) to 340 kg (750 lbs) with a maximum support spacing of 3. The following pages address the 2014 National Electrical Code® requirements for cable tray systems as well as design solutions from practical experience. The information has been organized for.
