

After-sales service for flame-retardant network cabinets

Overview

If you need to return the goods, please contact the company's after-sales service department in advance, and fax the number of returned goods and the reason in writing to the after-sales service department. Flame retardants are simply chemicals that are incorporated into materials that burn easily, in order to prevent ignition or slow down a fire. As one of the world's leading manufacturers of flame retardants, LANXESS offers a wide range of solutions for applications such as e-mobility, electronic. In planning and designing their installations, expert electrical planners and engineers or switchgear manufacturers are responsible for ensuring that those installations do not become the cause of a fire. As a complete, compact data center with all infrastructures such as air conditioning, UPS, monitoring, etc., the cabinet is also a separate fire compartment. EmCom's plastic residential enclosures are made of robust fire.
