

Albania Micro-Module Data Center Project

Overview

The Israeli-backed company Albania Data Center (ADC) will develop a 32MW data center in a free economic zone near Tirana, Albania's capital. According to Israeli outlet Globes, the 4.5 acre facility will cost around €100 million (\$118m) with the potential to expand up to. Albania is set to enter a new era of digital infrastructure as Israeli company ADC prepares to build the first-ever data center in the country, marking a major milestone for Albania's technology, energy, and investment landscape. It will be situated. As a government project in a NATO member state and candidate for EU membership, the venture will benefit from exceptional terms for Israeli companies. The. The owner of a service station in Astir was arrested for defrauding customers and even trying to sell their cars. Following sexual assault allegations, the chief prosecutor of the International Criminal Court, Karim Khan, is removed from office. The facility will have an initial capacity of 32 megawatts, expandable to 100 megawatts, and aims to attract European and American.
