

Angola Internet Data Center

Overview

Raxio Angola will be the country's first carrier-neutral Tier III data centre, playing a key role in strengthening Angola's digital infrastructure. It will support growing demand for digital services, drive transformation across industries, and improve both local and international connectivity. I. For Angola — a country that has invested heavily in submarine cable infrastructure to control its international connectivity — the next logical step is ensuring that the data centers where traffic terminates, content is cached, and cloud services are hosted are located within national borders. Intelligence dossier on INFOSI's National Cloud Data Center at Camama — 336 racks, 5,320 sqm, modular container design, 50 Gbps fiber ring, \$89M investment, H1 2026 launch, and Angola's government cloud anchor. The INFOSI National Cloud Data Center at Camama is the largest single data center. Raxio Group, the data centre operator with the widest footprint across Africa, today opened the biggest and most advanced facility in Angola. With capacity to deliver up to 3 megawatts of IT power and host over 800 server racks, Raxio Angola more than doubles the capabilities of any existing data. The Angola Data Centers Market includes a total of 9 data centers and 0 data center providers. List of available providers and facilities in Angola, including Colocation, Bare Metal Servers, and. This report is part of a series of market briefs developed by Xalam Analytics at the behest of Digital Investment Facility (DIF) under the Data Governance in Africa Initiative, on the data center market opportunity in sub-Saharan Africa (“SSA”). This analysis aims to provide key insights into.
