

Armored optical cable is Gyt

Overview

Gyta optical cables are commonly used in telecommunication networks for long-distance transmission of data signals. They are a type of armored cable that provides protection against harsh environments, such as extreme temperatures, moisture, and physical damage. Stranded Loose Tube Light-armored Cable (GYTS/GYTA) is a reliable and high-performance solution for fiber optic communication. Duct cables are typically. Overview: GYTS fiber optic cable is a robust and highly reliable solution designed specifically for outdoor duct and aerial installations. This guide. Loose tube construction, tubes jelly filled, elements (tubes and fillers when necessary) laid up around metallic central strength member, polyester yarns used to bind the cable core, filling compound filled in the apertures of the cable core, two ripcords, steel tape armored, then PE outer sheath.
