

Australian manufacturer extends single-mode optical cable

Article Overview

Several Australian manufacturers, including AFL, Prysmian, Fibre Optic Systems, and 4Cabling, produce and extend single-mode optical fibre cables for long-distance and high-performance applications.

Key Manufacturers and Capabilities

AFL operates a manufacturing facility in Tottenham, Victoria, producing a wide range of fibre optic cables, including single-mode designs suitable for harsh environments, above ground, below ground, and underwater applications. Their products are engineered for durability and performance across diverse telecommunications and utility networks. Prysmian manufactures standard and enhanced single-mode fibres (ESMF) compliant with ITU-T G.652 standards. Their enhanced fibres offer tighter geometrical, attenuation, and PMD specifications, enabling superior performance for long-haul, metropolitan, access, and premises applications. Prysmian also provides specialized fibres like TeraLight® and TeraLight® Ultra for ultra-long transmission and optimized chromatic dispersion management. Fibre Optic Systems (FOS), headquartered in Knoxfield, Melbourne, specializes in rapid production and custom manufacturing of single-mode fibre optic assemblies. With over 25 years of experience, FOS focuses on delivering tailored solutions with fast turnaround, supporting both high-volume and specialized projects. 4Cabling offers OS1/OS2 single-mode fibre cables fully compliant with ITU-T G.652.D and IEC 60793-2-50 standards. Their cables are designed for long-distance communication, maintaining signal integrity over extended stretches, and are available with various terminations and custom manufacturing options.
