

Austrian supplier active optical device QSFP28

Article Overview

Flexoptix is an Austrian manufacturer specializing in active optical devices, including QSFP28 transceivers and modules.

Overview of Flexoptix

Flexoptix, based in Austria, develops and supplies active optical modules and transceivers compatible with a wide range of networking systems. Their products are designed to work universally, even in systems where the original manufacturer does not provide compatible SFP or QSFP modules, which helps optimize inventory management and deployment flexibility .

QSFP28 Products and Applications

Flexoptix offers QSFP28 transceivers suitable for 100G Ethernet and high-speed data center interconnects. QSFP28 modules typically support four lanes of 25 Gbit/s each, enabling 100 Gbit/s data rates. These modules are used in:

- Data center internal networks
- Rack-to-rack connections
- High-performance computing and storage networks
- Metro and regional network interconnects The modules are designed for hot-swappable installation, high-density deployment, and low power consumption, making them ideal for modern data center environments .

Advantages of Flexoptix QSFP28 Modules
