

Automatic Cable Management Network Patch Panel

Overview

It is an all-in-one cable management solution consisting of 24 retractable Cat. Our innovative system enables 10x faster installation & maintenance and thanks to our Patchcatch it also allows up to 50% more. Patch panels function as the principal point for controlling network interfaces, enabling more efficient organization and access of cables in physical network configurations. Patch panels allow for quick changes to be made to the network without physically interacting with the end devices or the.

Executive Summary: A single mislabeled port in a 400-cabinet data center can cost three hours of troubleshooting time. Poor patch panel cable management doesn't just make racks look messy — it silently drains operational budgets through extended MTTR (Mean Time To Repair), thermal inefficiency, and. A PCU (Panel Control Unit) is equipped at the front of the patch panels and scans the area in front of each port. If a connector of an intelligent patch cord is now connected with the patch panels port, the cable ID is recognized. No matter the cable type or length of the connection trace, PATCH MANAGER can display the full end-to-end connectivity.
