

Benin Aluminum Alloy Cable Management Frame Specifications

Article Overview

The Benin Aluminum Alloy Cable Management Frame is made from high-strength aluminum with customizable thickness, surface treatments, and ISO9001-compliant production.

Material and Construction

The frame is manufactured using A-grade aluminum alloy, ensuring high strength, durability, and environmental friendliness. Scrap aluminum is not used, and the alloy is selected to meet project-specific requirements. Thickness options range from 0.8 mm to 2.0 mm, with custom thickness available upon consultation.

Surface Treatments and Finishes

Benin aluminum frames offer a variety of surface treatments to enhance durability and aesthetics:

- Anodizing: Silver or champagne finish
- Powder coating: White, bronze, charcoal, or black
- Optional finishes: Mill, wood grain, electrophoresis, or polishing These treatments improve corrosion resistance and provide a professional appearance suitable for industrial and commercial installations.
