

Benin Anti-corrosion Lighting Distribution Box Price

Article Overview

Prices for anti-corrosion lighting distribution boxes in Benin vary depending on specifications, customization, and shipping terms, and are typically provided upon request by suppliers.

Overview

Anti-corrosion lighting distribution boxes in Benin are designed for industrial and hazardous environments, including petroleum, chemical, textile, and high-dust areas. They are often explosion-proof, made with engineering plastic shells and internal aluminum alloy, and feature anti-static coatings, corrosion resistance, and customizable circuit protection. These boxes are suitable for wall mounting and can include earth leakage protection, color-coded indicators, and flexible cabling options.

Pricing Factors

The cost of these distribution boxes depends on several factors:

- **Material and Build:** Engineering plastics, aluminum alloy, and anti-corrosion coatings increase durability and price.
- **Explosion-Proof Rating:** Boxes with flameproof (Ex d) and increased safety (Ex e) chambers are more expensive.
- **Customization:** Adding features like earth leakage protection, specific voltage ratings, or cable configurations affects the price.
