

Botswana Multimode Optical Attenuator Price

Article Overview

Multimode optical attenuators in Botswana are available online, with adjustable models priced around BWP 1,200–1,500 depending on specifications and attenuation range.

Available Options

One example is the uxcell SC Mechanically Variable Optical Attenuator, which is available for purchase in Botswana through Ubuy. This device supports both single-mode and multimode fibers (62.5/125 μm for multimode) and offers adjustable attenuation from 0 to 30 dB, making it suitable for telecom, lab experiments, and fiber optic network testing. It operates at multiple wavelengths including 850 nm, 1310 nm, and 1550 nm, ensuring compatibility with standard multimode optical systems.

Pricing

The current price for this adjustable multimode optical attenuator in Botswana is listed on Ubuy at approximately BWP 1,200–1,500, depending on shipping and availability. Prices may vary slightly based on supplier promotions or stock levels.

Features and Applications

- Durable construction for reliable operation under varying conditions
- Precise control of optical signal strength for testing and calibration
