

Cable from the distribution box to the open cable

Overview

Run four Cat6 cables (with RJ45 jack points) from the home distribution box to the main entertainment hub and at least two Cat6 cables to all other outlet positions. Any work inside the service area must be performed by personnel that is approved to work with high voltage electrical installations. All the electrical sub circuits are originated from a Distribution Board. The Main feeder cable to the Distribution Board should be able to handle the total power anticipated when all the sub circuits in the Distribution Board. Cabling should be a 'star configuration' and include a home distribution box. Minimum specification of Cat6 cables. Single Phase Distribution Box generally consists of Double Pole MCBs, Single Pole MCBs, and RCCBs. We will install an ETP when we come to complete the connection but if you want to install one earlier, they can be purchased from an electrical supplier from the ETP to the home distributor box. Conduit or pipe provides a pathway for the cable to be fed through.
