

Cable tray connecting tee price

Article Overview

Cable tray tee connectors are available from multiple suppliers, with prices varying based on material, size, and order quantity.

Overview

A cable tray tee connector is a fitting used to create a three-way intersection in a cable tray system, allowing cables to branch off in different directions while maintaining organized routing . These connectors are typically made from galvanized steel, stainless steel, aluminum alloy, or FRP (fiberglass-reinforced plastic), offering durability and corrosion resistance . They are essential for maintaining structural integrity and load distribution in cable management systems .

Price Considerations

- **Material:** Stainless steel and aluminum alloy tees generally cost more than galvanized steel due to higher corrosion resistance and strength .
- **Size and Type:** Equal or unequal tees, as well as horizontal or vertical configurations, affect pricing .
- **Quantity:** Bulk orders often reduce the per-unit cost. While exact prices are not always listed online, suppliers on platforms like IndiaMART provide latest prices upon inquiry. Top suppliers in India include Super Cable Tray Private Limited, Bajiyya Industrial Corporation, and Amcon Industries, who offer bulk order support and quick responses .
