

Cable tray crossing

Overview

The cable tray crossing is an essential fitting for secure and organised cable management systems. It enables precise horizontal crossings of up to four cable trays and ensures stable connections for power, data, and control cables. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. Cable tray fitting accessories, also known as cable tray accessories, are a wide range of components used to connect, support, or change the direction of mated cable trays. Materials and finishes available are mild steel pre galvanised as standard with mild steel hot dip galvanised after manufacture and stainless steel grade.
