

Cable tray elbow riveting machine price quote

Article Overview

Cable tray elbow riveting machines typically range from \$10,000 to \$50,000 depending on automation, capacity, and features.

Price Range and Factors

The cost of a cable tray elbow riveting machine varies widely based on several factors:

- **Automation Level:** Fully automatic machines with features like vibratory feeders, vacuum pickup arms, and digital counters (as seen in ERSM automatic riveters) are at the higher end of the price spectrum due to their ability to handle thousands of rivets per hour with minimal human intervention. Semi-automatic or manual machines are significantly cheaper.
- **Production Capacity:** Machines capable of high-speed riveting (e.g., 3,600 rivets per hour) or handling larger rivet diameters require more robust motors, precision tooling, and advanced control systems, which increases cost.
- **Material and Build Quality:** Machines constructed with stainless steel, corrosion-resistant metals, and premium motors or gears are more expensive but offer longer operational life and reliability.
- **Supplier and Region:** Prices vary depending on whether the machine is purchased new from manufacturers like ERSM or W. G. Challenor, or as a used/rebuilt unit from suppliers in the UK or online marketplaces like eBay. Used machines can be 30-50% cheaper than new ones.
