

Cable tray tee specifications 300-300

Article Overview

A 300mm x 300mm cable tray tee is typically made from pre-galvanised steel, suitable for medium to heavy duty applications, and designed to connect standard 300mm straight ducting.

Material and Finish

- Standard Material: Mild steel, pre-galvanised (PG) for corrosion resistance; stainless steel (grade 1.4404 / 316L) available on request for harsh environments .
- Finish Options: Pre-galvanised (PG), hot-dip galvanised after manufacture (HDG), or stainless steel (SS) for durability .

Design and Dimensions

- Type: Equal tee (300mm x 300mm) for creating a perpendicular branch in a cable tray system .
- Compatibility: Designed to interface with standard 300mm straight ducting; may require slotless joiners (e.g., Part No: TC1279-287A) at each connection for a smooth and strong joint .
- Space-Saving: Some tees are designed as compact t-pieces to optimize routing in constrained areas .

Duty Rating

- Medium to Heavy Duty: Suitable for supporting substantial cable loads in industrial or commercial installations .
