

Cable trays behind pipes

Overview

Cable trays are produced in different heights and widths to give more choice for loading space availability. We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. Proper installation is paramount, as it ensures long-term reliability and safety in electrical systems. They are approved for supporting various types of circuits, including service conductors, feeders, branch circuits, communications circuits, control circuits, and.
