

Can a low-power router be connected to a fiber optic cable

Overview

Yes, you can use your own router with fiber internet, as long as it has a Gigabit Ethernet WAN port to connect to your ISP's Optical Network Terminal. Upgrading to a Wi-Fi 6 or 6E router helps you get the full benefit of symmetrical fiber speeds. Just know that bringing your own gear means you. Setting up a fiber internet connection requires understanding key hardware components and following a specific connection sequence to establish your home network. This guide details the necessary physical and digital steps to connect your fiber line and activate your internet service. You need a modem or ONT to do so. As internet speeds continue to evolve, fiber optic broadband is becoming the gold standard for ultra-fast and reliable internet connections.
