

Canada LC Adapter Anti-Screening

Article Overview

LC adapter anti-screening devices in Canada prevent unauthorized access to fiber optic ports, enhancing network security and compliance.

Overview of LC Anti-Screening Devices

LC anti-screening or blockout devices are designed to physically restrict access to LC duplex ports, preventing unauthorized removal or insertion of fiber optic cables. These devices are particularly useful in data centers, network switches, HBA/NIC ports, and user outlets, reducing the risk of accidental or intentional damage, data breaches, and network downtime (Panduit) .

Key Features

- Tamper-resistant design: Devices fit all standard LC adapters and receptacles, including Opti-Core® LC and Keyed LC patch cords .
- Lock-in clips: Allow connectors to be securely locked into adapters, preventing unauthorized removal .
- Installation/removal tool: Simplifies secure installation and removal of blockout devices or lock-in clips in modules, cassettes, or patch panels .
- Compliance: Devices meet TIA/EIA-604FOCIS-10 standards for tamper-resistant LC adapters .
- Package options: Typically sold in sets of ten with one installation/removal tool .
