

Chad construction distribution box switch model

Article Overview

Chad construction distribution boxes are modular, custom-engineered switchboards designed for high reliability, safety, and adaptability in harsh or restricted environments.

Overview

Chad distribution box switch models are modular switchboard systems that combine robust construction with flexibility for various electrical distribution needs . They are designed to handle up to 6300 amps and provide protection up to IP54, making them suitable for both indoor and outdoor applications, including construction sites, restricted spaces, and harsh environments .

Construction Features

- **Modular Design:** Type-tested system allowing for easy modifications and reduced delivery times compared to fully welded switchboards .
- **Materials:** Electro-galvanized or iron-phosphated steel frame (2.0mm), sheet steel doors/covers (1.5mm) with continuous resilient sealing rubber gaskets, and 70-micron powder coating in light grey or orange .
- **Switchpanel Gland Plates:** 6mm thick for secure cable entry and protection .
- **Plinth:** 2.0mm sheet steel for stability and durability .
- **Arc Fault Containment:** Unlimited arc fault containment options available, ensuring safety in high-power applications .
