

Chile's main optical cable

Overview

Chile, in partnership with Google, is launching the Humboldt Cable System, the first fiber-optic submarine cable connecting South America with Asia and Oceania. Chile has taken a huge and historic step forward at the digital level, thanks to the implementation of the Humboldt underwater cable. Our country will thus become the first digital connection point between South. Today, we're joining Desarrollo País of Chile and Office of Posts and Telecommunications of French Polynesia (OPT) to announce Humboldt, a subsea cable route linking Chile, French Polynesia, and Australia — the first ever to directly connect South America and Asia-Pacific. This joint initiative between Google and the Chilean government aims to.
