

China-Africa Temperature Measurement Optical Cable for Sale

Article Overview

Distributed temperature sensing (DTS) fiber optic cables from China are available for sale and export to Africa, offering high-precision, long-range temperature monitoring for industrial and infrastructure applications.

Product Overview

Distributed Temperature Sensing (DTS) Optical Cables are specialized fiber optic cables that allow continuous temperature measurement along their entire length, rather than at discrete points. They provide high accuracy (less than 1°C), real-time monitoring, and long-distance measurement capabilities, making them suitable for applications in mining, tunnels, petrochemical plants, power systems, and large-scale industrial facilities (Hunan Shuanglin Communication Technology Co., Ltd.), . Key features include:

- Full-length sensing: Measures temperature along the entire cable, enabling precise monitoring over kilometers.
- Durability: Resistant to harsh environments, mechanical impact, and electromagnetic interference.
- Safety: Intrinsically safe with low optical signal power, suitable for explosive or high-risk areas.
- Quick response: Detection intervals as short as 1-2 seconds with positioning accuracy up to ± 1 meter.
- Flexibility: Can be installed in areas with limited accessibility or complex layouts.
