

Columbia Molded Cable Tray Price

Article Overview

Columbia molded cable trays typically range from \$10 to \$50 per meter, depending on material, size, and supplier.

Columbia molded cable trays are available in various materials, including plastic (FRP), steel, and aluminum, which significantly affect pricing. For general-purpose installations, steel trays are usually the most affordable, ranging from \$5 to \$25 per meter, while aluminum trays are lightweight and corrosion-resistant, costing \$6 to \$30 per meter. FRP (fiberglass reinforced plastic) trays, which are molded and highly durable, typically range from \$10 to \$50 per meter, depending on specifications such as size, design, and environmental resistance. Pricing can also vary based on bulk orders, coatings, and custom sizes. For example, powder-coated or hot-dip galvanized trays are more expensive due to enhanced corrosion resistance, while pre-galvanized trays are cheaper but less durable in harsh environments. Columbia molded trays are often listed on suppliers like etrailer, where you can view specific product prices and options. Additional factors influencing cost include shipping, labor for installation, and regional supplier pricing. Buying in bulk or negotiating long-term supply contracts can reduce per-meter costs, especially for large projects. In summary, for a standard Columbia molded cable tray, you can expect to pay around \$10-\$50 per meter, with the exact price depending on material, size, finish, and order quantity. For precise pricing, checking supplier listings like etrailer or contacting distributors directly is recommended.
