

# Congo ST Adapter Low Loss

## Overview

Low Optical Loss: Typical insertion loss  $\leq 0.2$  dB; duplex versions maintain signal integrity even with frequent matings. Mount style is horizontal and hybrid adapters are also available. What temperatures can the ST adapter be used in?

The ST adapter can be used in temperatures as low as  $-40^{\circ}\text{C}$  and up to  $75^{\circ}\text{C}$ . These products are fully intermate able with all standard ST products and deliver very high stability under a wide range of applications and conditions. These adapters feature a zirconia split sleeve, which provides high. Our fiber optic adapters are essential components for connecting two fiber optic connectors with precision, providing stable transmission and minimal signal loss. 2 dB, down from the traditional 0.
