

Core switch 24 ports 950tbps

Overview

The Cisco C9500-24Q-A is a high-performance enterprise switch engineered for critical business networks. As part of the Cisco Catalyst family, this enterprise switch is equipped with advanced Network Advantage software features, offering scalable Layer 3 routing and robust switching. Cisco Catalyst 9500 Series Switches, based on the Cisco ® Unified Access Data Plane (UADP) Application-Specific Integrated Circuit (ASIC), are Cisco's lead fixed enterprise core and aggregation switching platform and, as part of the Catalyst 9000 family, are built to transform your network to. Cisco Catalyst™ 9300 Series Switches are Cisco's lead stackable enterprise access switching platform and, as part of the Catalyst 9000 family, are built to transform your network to handle a hybrid world where the workplace is anywhere, endpoints could be anything, and applications are hosted all. The VSU connects to peripherals through an aggregate link, realizing service switching in milliseconds upon a failure. VSU virtualization technology is supported to increase bandwidth through link aggregation, which greatly improves forwarding capabilities of the switch. Multiple physical switches. L3 managed 10G uplink Ethernet core routing switch with 8*10/100/1000M RJ45 ports and 12*1/10G SFP+ fiber ports. Built-in 75W power supply and supports 1U/19" cabinet installation.
