

Cost of good cable trays

Article Overview

Cable tray prices typically range from \$2 to \$25 per meter, depending on material, type, and finish, with steel being the most common and cost-effective for heavy-duty applications.

Price Ranges by Material

- Galvanized Steel: \$10–\$30 per meter; offers durability and mechanical strength, suitable for most industrial and commercial installations .
- Stainless Steel: Higher cost, often \$20–\$50 per meter; ideal for corrosive environments or chemical exposure due to superior rust resistance .
- Aluminum: \$20–\$50 per meter; lightweight and corrosion-resistant, suitable for applications where weight is a concern but mechanical strength is moderate .
- Plastic/FRP: \$2–\$15 per meter; budget-friendly, but not suitable for heavy loads or high-temperature environments .

Price Influencing Factors

- Tray Type: Ladder trays are more expensive than perforated or wire mesh trays due to higher load capacity .
- Coatings and Finishes: Hot-dip galvanization (HDG) and powder coatings increase durability but add to cost .
- Size and Customization: Wider or custom-length trays cost more; bulk orders can reduce per-unit price .
- Installation and Shipping: Labor, equipment depreciation, and transport costs can significantly affect total project cost .
