

Distribution box cover 1730

Overview

Oldcastle Infrastructure's Carson Specification Grade 1730-24 is the ideal rectangular enclosure solution for your project's commercial meter/valve box. Hubbell offers three distinct brands of underground enclosures. All three are built with a cover combination. Weights and dimensions may vary slightly. All information contained on this sheet is current as of the time of the design of the HDPE 1730-12, 1730-18 and 1730-24 access boxes. Our 1730-24 is designed to withstand close to twice the side loads compared to our already robust 1730-18. The 30-24 has greater storage capacity than the other. Maurice Electric supplies electrical products, lighting solutions, and equipment for commercial and industrial projects.
