

# Distribution diagram of the distribution box

## Article Overview

A distribution box diagram shows the main incoming supply connected to protective devices, busbars, neutral and earth links, and outgoing circuits for safe and organized power distribution.

### Overview of a Distribution Box

A distribution box (DB box) is a centralized electrical enclosure that receives incoming power and distributes it to multiple circuits safely. It contains key components such as:

- Main Switch/MCB: Controls the incoming supply and acts as the main isolator.
- RCCB/RCD: Provides protection against leakage currents and electric shocks.
- MCBs (Single or Double Pole): Protect individual circuits from overloads and short circuits.
- Busbars: Metal strips that distribute electricity to all outgoing circuits.
- Neutral and Earth Links: Ensure proper return paths and grounding for safety.
- SPD (Surge Protective Device): Optional, protects against voltage surges .
