

Does Guangyin have a built-in 4G module

Overview

The SIM7600G is an integrated wireless communication module. It features 4G CAT1 with an uplink speed of 5Mbps and a downlink speed of 10Mbps, and supports GNSS positioning (GPS, BD, GLONASS). Experience lightning-fast data throughput and high bandwidths with the Arduino Pro 4G Module, powered by a robust Cat. This enables quick data download and upload, ensuring connectivity in even the most remote locations thanks to the secure data transfer and long-range. The SIM7600G 4G module offers 4G CAT1 speeds, GNSS positioning, and supports various network protocols.) was established in Xuzhou City, Jiangsu Province. On January 28, 2022, the company completed its seed round (angel round) of financing, with Jiangmen Venture Capital and MiraclePlus as investors. In February. Add 4G/3G/2G functionality without programming, just with a few configuration clicks. Compatible with all ArduSimple boards with onboard XBee socket. It can be used with different Portenta. Spitz (GL-X750V2) with the EC25-AFFA CAT4 module is now an AT&T certified device (AT&T IoT Data Plans) (refer to the user guide PDF), the coverage of Spitz is improved, especially for rural places. □Dual-band 4G LTE NETWORK- EMERGENCY BACKUP SOLUTION□Comes with micro sim card slot, transfers 4G LTE.
