

Does the PTN display light after plugging in the optical module

Overview

The meaning of the LEDs depends on the mode of operation (= boot or normal) in which the PTN-1-10G-LW module currently is running. After plugging in the module or rebooting it, the module turns into the boot operation, see Table 2. The 2-OLS interface module (=IFM) is an Optical Low Speed Serial interface module with four ports: two Optical Serial ports (=port1, port2) and two E1 ports (=port3, port4). The main supported features are: No. OptiX PTN 905: Access product manuals, HedEx documents, product images and visio stencils. For ATN devices, a minimum clearance of 50 mm is required on both the left and right sides of the cabinet to ensure good ventilation. Huawei A63B cabinet is recommended. If customers choose to purchase 2. Status indication of PSU (s) and CSM (s);. The Hardware Edition (labeled as CARD_ID) and Node Number on the NSM are set by rotary DIP switches. The 10G WAN PHY operates at a data rate.
