

Does the fiber optic cable need to be run to the equipment room

From standard 1U to 8U sizes to
fully customized Non-standard enclosures.

Overview

One of the implications of this is the routing of your cables cannot interfere with access to equipment [770]. Ideally, you will run those cables with. To install fiber optics, your engineers will use a few specialized tools and equipment, including: 3. Engineers and. In multistory buildings, for example, the backbone connects the equipment or computer room in the basement with telecommunications closets located on every floor. Design, installation and user considerations are vital to putting in building backbones. Scott Partington, Berk-Tek Inc. If possible, use an automated puller with tension control or at least a breakaway pulling eye. Outdoor cable may be direct buried, pulled or blown into conduit or innerduct, or installed aurally between poles.
