

Does the outer casing of the light module need to be removed

Overview

Carefully remove the outer casing to expose internal components, 4. Reassemble the components in reverse order as required. Depending on the model, you may find various parts such as the LED light, solar panel, rechargeable batteries, and additional circuitry or controllers. Take a moment to examine the layout and take note of. We will outline the key steps for safely replacing a single LED module, ensuring your LED flood lights continue to operate effectively. Initiating a Safe Power Disconnection The first and most critical step is to ensure the complete electrical isolation of the fixture. So, does anyone know if you can remove the case and if the module will still work afterwards?

If its plastic, you could cut. I get the feeling I need to remove the outer casing (the white part there) but that seems like a pain so hoping someone might be able to tell me there's an easier solution. I've tried to push out the bulb and to twist it but it doesn't come out easily at all. Any help would be appreciated! Archived. Rather than have this fixture dangling from the wall, I plan to dismantle the casing and cap off the wiring.
