

Dominican fiber optic cable burned

Overview

Claro Dominicana has attributed widespread disruptions to its fiber optic network on Monday, 7 July 2025 to excavation work being carried out by the Monseñor Nouel Aqueduct and Sewer Corporation (Coraavega). The redundancy system prevented a total blackout, but service continuity was compromised. Third-party works are the main source of recent and past incidents. The telecommunications giant stated that the digging, located along the La Vega-Bonao. The South America-1 Cable Network (SAm-1) is a nearly 25,000 km subsea fiber-optic cable ring surrounding Latin America, including 22,000 km of submarine cable and 3,000 km of terrestrial links across Argentina, Chile and Guatemala. The Americas Region Caribbean Ring System (ARCOS-1) is a fiber optic submarine communications cable of 8,400 kilometers that extends between the United States, the Bahamas, the Turks and Caicos Islands, the Dominican Republic, Puerto Rico, Curaçao, Venezuela, Colombia, Panama, Costa Rica. This week: Ryan Polk and Steve Song from the Internet Society join the podcast to discuss the rise in subsea cable cuts and the role of resilient Internet infrastructure in preventing and recovering from outages. Whether from unintentional damage (common) or seemingly intentional sabotage (less.
