

Drilling holes in the roof to fix the cable tray

Overview

Follow Proper Procedures: Prepare the work area, check for electrical wiring, wear protective gear, use a stable ladder, mark drilling spots accurately, drill slowly, apply sealant and roof flashing, and clean up afterward. Secure Fixtures Properly: Tighten fasteners, apply sealant around fixtures. This guide breaks down the process step by step. Plan the Route Before You Drill No installation should start without a plan. Factor in clearance, load capacity, and cable separation needs from the get-go. The document is a training manual that outlines cable tray. The following recommendations are intended to be a practical guide to ensure the safe and proper installation of cable ladder and cable tray systems and channel support and other support systems.
