

Dual-fiber single-mode optical module gigabit 10km

Motor protection controller

Overview

VC-SFP-10G-LR is a high performance and cost-effective 10GBASE-LR SFP+ transceiver module for 10 Gigabit Ethernet links up to 10km over single mode fiber. The transceiver features a highly reliable 1310nm DFB transmitter and PIN photo-detector into duplex LC optical connector. Cisco SFP+ modules offer the following features and benefits. It uses two single mode optical fibers and the speed rate can be up to 10Gbps, transmission distance up to 10km. This product needs to be used in pairs and matched up with fiber converter and optical Ethernet switch with SFP slot, it can be used in Ethernet, telecom and other applications. The industry-standard Cisco Small Form-Factor Pluggable (SFP) Gigabit Interface Converter (Figure 1) links your switches and routers to the network. 31Gbps fiber connectivity over Single Mode fiber cable using a 1310nm wavelength "window". It is programmed for installations in switches, routers, servers, PCI Cards, Firewalls and other connections in.
