

EU cable tray construction

Overview

EU series strengthened type cable trays can be used in all situations from low voltage to main power lines. Thanks to the special form on it, the reinforced carrying capacity is maximized. Strong and durable – Made of hot-dip galvanized steel or stainless steel, suitable for indoor and outdoor applications. Fast installation – Reduce installation costs with quick and efficient. These are cable management systems composed of trays, mounting support systems, direction changing parts, connection parts and fittings with the purpose of carrying and fixing cables safely in the electrical installations. Product. DKC is a European leader, and offers a comprehensive range of cable tray systems and energy protection, transport and distribution solutions for civil and industrial infrastructures. We also play an important role as advisor and guide during the installation process.
