

East Africa Fireproof Cable Tray Procurement Prices

Article Overview

Fireproof cable trays in East Africa, particularly galvanized steel types, are available from multiple suppliers in Kenya, with prices varying by material, size, and design.

Overview of Fireproof Cable Trays

Fireproof cable trays are typically made from galvanized steel, which provides corrosion resistance and fire protection, though stainless steel and aluminum options are also available . Common designs include:

- Ladder trays: Ideal for heavy-duty industrial or commercial installations, offering maximum ventilation and support for large cables .
- Perforated trays: Provide moderate airflow while maintaining cable protection, suitable for general commercial use .
- Solid bottom trays: Offer enhanced protection for sensitive environments like data centers or control rooms .
- Wire mesh trays: Flexible and easy to access, suitable for office spaces or areas requiring frequent cable management . Standard dimensions for cable trays in Kenya range from heights of 50mm to 600mm and widths of 25mm to 100mm, with lengths typically 8 feet (2.44 meters) . Thicknesses vary from 0.6mm to 3.0mm, depending on load requirements.

Price Range

While exact prices fluctuate based on supplier, material, and tray specifications, fireproof galvanized cable trays in Kenya generally fall within the following ranges:
