

Electricity meter control distribution box

Overview

The metering distribution box is a modern distribution equipment integrating electric energy metering, distribution and control, which is specially designed for accurate management of power consumption and power safety. Electrical control panels and distribution boxes are the backbone of modern electrical systems. From powering homes and industrial facilities to supporting medium-voltage infrastructure, these enclosures ensure safe, efficient, and reliable power distribution. Typically installed at the point of entry or on an exterior wall, a meter. Robust electrical meter boxes engineered for utility metering, sub-metering, and revenue-grade installations — available in stainless steel, mild steel, and fiberglass with NEMA 4X and IP66 ratings as standard options. Today, electrical systems are essential for homes and industries. Each outgoing line can be individually.
