

Extension of electrical wiring in distribution box

Overview

MCB distribution board extension boxes are designed to provide additional space for accommodating more circuit breakers or wiring within your existing consumer unit setup. Extending residential electrical wire is a common need when modifying a space, adding an outlet, or relocating a light fixture. Ideal for system upgrades, retrofits, or future circuit expansion, these extension boxes maintain a tidy and compliant. A distribution box is the heart of any electrical system. Whether in a home or an industrial facility, this box keeps your electrical setup organized, functional, and efficient. Despite this, it often ekes out an inconspicuous existence in the basement or utility room until something stops working properly or an extension becomes. When your electrical panel boards & accessories need room to grow, extension boxes are the perfect solution.
