

Fiber Optic Cable Conduit Pulling Auxiliary Device

Overview

A fiber optic cable puller is a specialized tool used during the installation or pulling of fiber optic cables. The Zinger is designed to be used with a cordless or electric drill to assist in pushing or pulling fiber optic cable, a fiberglass rodder, or other types of stiff wire or cable (product) through a conduit. Using the Zinger greatly. stallers should consider bend radius, tension, jamming, and fill ratio before performing any conduit pull. Corning Optical Communications recommends the American Polywater® PULL-PLANNE able in conduit, observe the manufacturer's recommendations for maximum pulling tension and bend radius. The Hitch Mount attaches directly into a typical 2" (51 mm) square Reese-type receiver and the cable puller mounts in a 2 1/2" (64 mm) square fixture. An adjustable jack is included for added stability and height adjustment. Unlike most hydraulic measuring systems, this system is not affected by changes in. The quality tools from Katimex® are easy, safe and quick to use.
