

Fiber Optic Cable GTFJZU-

Overview

• High strength, light weight, easy to splice and install, support high capacity data transmission. • Applicable for temporary cabling and repeated use. • Jacket material: TPU or other agreed ones. They effectively. Farnell's fibre optic cables are engineered to provide high-speed, high-bandwidth data transmission over long distances with minimal signal loss. Ideal for telecommunications, data centres and networking applications, our fibre optic cables are available in single-mode and multimode configurations. Fiber optic cable is designed to transmit data using light signals instead of electricity, making it faster, more secure, and immune to electromagnetic interference compared to traditional copper cables. • Customized design is available. In addition to numerous fiber cable types, we offer a wide range of fiber optic components, such as fiber optic connectors, fiber pigtails, splice. Explore optical fiber cables by HUBER+SUHNER, optimized for fixed or mobile applications, meeting high mechanical, thermal, and fire standards.
