

Fiber Optic Endface Inspection Instrument EC400BC

Overview

Our fiber end-face microscope is a portable type of fiber end-face inspector developed. By magnifying 200~400 times of the objects, you can identify defects and scratches on the end-face of connectors. The appearance remains, but the heart is stronger EasyCheck; V2 is a new generation fully digital. The leader in fiber end face quality control industry - professional fiber end face microscopes Single-focus, dual-magnification efficient detection with clear image quality. Dimension's dual magnification fiber endface Inspector can quickly and efficiently inspect the quality of fiber end-faces. The EasyCheck V2 is a next-generation digital fiber endface inspector developed by Dimension Technology, engineered for high-precision inspection of fiber optic connectors, transceivers, TOSA/ROSA components, and more. Featuring a high-resolution 8-inch TFT display and advanced CMOS imaging, it. Thorlabs' Fiber End Face Inspection Systems include a Fiber Cleave Analyzer that performs interferometric measurements on bare fiber and a Visual Scratch & Defect Inspection System to examine the end face of fiber connectors. It comes along with portable 3.
