

Fiber Optic Enterprise Router 100G FOB Price

Article Overview

The FOB price for a 100G fiber optic enterprise router typically starts in the range of \$20,000 to \$50,000, depending on model, features, and vendor.

Pricing Overview

High-performance 100G routers from vendors like Cisco are designed for enterprise and data center networks, supporting high throughput, low latency, and advanced routing features. According to Cisco's Global Price List, 100G routers and associated QSFP transceivers are listed with base prices that can serve as a reference for FOB pricing . The exact FOB price depends on factors such as:

- Router model and configuration (e.g., port density, modularity, redundancy)
- Included optics and transceivers (e.g., 100GBASE LR4, SR4, or CWDM4 QSFP modules)
- Order volume and vendor agreements
- Shipping location and terms For example, a Cisco 100G router with standard QSFP modules may have a list price starting around \$20,000-\$30,000, while fully loaded enterprise models with multiple 100G ports and advanced features can exceed \$50,000 .
