

Fiber optic cable manufacturer s price

Article Overview

Current fiber optic cable spot prices range from \$0.30 to \$6.00 per meter depending on type, core count, and quality.

Current Market Prices

- Single-mode fiber (OS2): Typically used for long-distance transmission, prices range from \$0.30 to \$2.80 per meter, depending on fiber count (e.g., 12-core vs. 96-core) and brand quality, with premium glass like Corning costing more due to lower attenuation over long distances .
- Multimode fiber (OM3/OM4): Common in high-speed data centers, prices are higher due to manufacturing complexity, ranging from \$1.50 to \$6.00 per foot .
- Armored cables: Include steel tape or other protective layers for outdoor or high-risk environments, which increases the cost relative to standard indoor cables .

Wholesale and Factory Direct Pricing

Manufacturers and wholesalers often offer factory direct prices with lower minimum order quantities (MOQs) and bulk discounts. Platforms like Global Sources list over 680 fiber optic cable products with direct factory pricing, covering various types including gyty/gyfty cables and active optical cables (AOCs) for 40G, 100G, and 400G applications .

Price Influencing Factors

- Raw material costs: Glass, copper, and polymer prices directly affect cable pricing .
- Core count and cable type: Higher core counts and specialized cables (e.g., armored or high-speed AOCs) increase unit prices .
