

Fiber optic cable with copper armor

Overview

Armored Fiber Optic Cable is a version of fiber that is covered with an additional metal layer to prevent fractures as well as corrosion from rodents, moisture, and supplementary threats. We have all the components to optimize & install your network! The FTSCO-3C25X12F9-PSP is an Armoured Fiber Copper Composite Cable can transmit both power and other signals over a single cable to reduce deployment cost. Also, both the inner and outer breakout. With a durable protective layer, they are ideal for harsh or high-traffic environments. This article explains what armored fiber cables are, their key. DuetConnect Hybrid Copper-Fiber Cables allow one cable to offer the advantages of DC power and fiber, safely delivering both over long distances to remote locations where standard power is unavailable or too costly to install.
