

Fiber optic light turns red on router

Overview

Orange, amber, or red lights usually indicate a problem ranging from a firmware update in progress to a lost internet connection. Most of these issues can be resolved with a simple power cycle (unplug for 30 seconds, plug back in). Here are some steps you can take. Normally, each light reflects a specific function: Power Light: Informed if the router is powered on. Wi-Fi Light: Shows the status and. That blinking red LOS light means your router has lost its connection to your internet provider's network. You might feel like you're staring into the abyss of digital darkness, wondering what went wrong. Blinking green typically means data.
